

Frontend Developer

Leandro Gavidia Santamaria

Professional Experience

Programmer Analyst

Curadeuda

Mexico (Remote)
June 2023 - Present

- Improvement of software systems at a technical and visual level to increase the quality and reduce costs of these same systems.
- Design of process and flow diagrams as support resources for the company's developers for a more efficient development.
- Development and documentation of Apex classes in Salesforce to connect external software systems to allow bi-directional data transfer between those systems and Salesforce.

Frontend Developer

Curadeuda

Mexico (Remote)
Sep 2022 - June 2023

- Creation of user interfaces that have a more user-friendly flow using Sass with NextJS. As a result achieve lower abandonment rate and convert more users into customers.
- Refactoring of old and obsolete JavaScript code into modern and more optimal TypeScript code for application performance improvement and development time comfort.
- Set up Mixpanel events for experiments within Curadeuda products and detect which interface variants cause a higher conversion impact on users.

Software Developer

Freelance

Venezuela (Remote)
Oct 2020 - Present

- Design and development of online platforms such as: E-Commerces, blogs, academies, personal branding...
- Development of Web2 and Web3 projects.

Projects

Solana Address Searcher

Web application to search for a Solana address and get its data.

Link: <https://solana-address-searcher.vercel.app/>

June 2022 - July 2022
